Choose a Files Format ## Adobe Photoshop CS6 Filename Guidelines * Files should be stored in the TIFF or PSD file format. * The files should be saved with the "Keep Originals" button selected (this applies to both TIFF and PSD files). * The file format is not "fixed" to one system and might be saved on different computer systems in future. * The file extension is not fixed and is simply the suffix of the file. * Files may be compressed using Photoshop's Compressor. * The file size is not fixed. The RAW (NEF) format (Adobe.com/CameraRAW) is the file format for Canon cameras. It is a file type that includes all the raw, or unedited, information of a digital photograph. The RAW file contains the complete digital image data for the pixels in the raw file. The image file stores data that specifies the pixels from the digital image. This data is converted to an image when the photograph is printed or displayed on a computer screen. ## TIFF The TIFF (Tagged Image File Format) is the standard industry file format for

Clostridium difficile-associated pseudomembranous colitis in a child with new onset of diabetes mellitus. A 5-month-old boy presented with a 3-day history of gastroenteritis. He was admitted and treated with antibiotic for suspected sepsis. Gastric fluid culture was positive for Clostridium difficile, and the patient was treated with metronidazole. One day after admission, the patient developed abdominal distention, loose yellowish stools and high-grade fever. Clostridium difficile-associated pseudomembranous colitis was diagnosed by clinical presentation, the diagnosis of which was confirmed by C. difficile toxin assay. Empiric therapy with metronidazole was discontinued. He recovered completely with oral vancomycin treatment. He had no recurrence of diarrhea within a 1-year follow-up period. We report an unusual case of C. difficile-associated pseudomembranous colitis. The patient's presentation was unusual and probably secondary to a fasting, prolonged course of antibiotic therapy.Q: How do i use'save' to save more info about element in document.ready()? So i'm learning html and js at the same time, so i've coded a little game (just one little level). Now i want to save the elements a user clicks. jQuery(document).ready(function(){ var $goalElement = jQuery('#goal'); var $playButton = jQuery('#playButton'); var

```
$timer = jQuery('#timer'); var $level = 1;
$goalElement.click(function(){ $goalElement.animate({
marginTop: '-200px' }, 500); levelCount++; $level++;
$playButton.text("Stop"); $timer.text("Level " + levelCount); if
(levelCount == 3) { $timer.css("font-size", '50px');
