AutoCAD is now owned by the German software company Autodesk. In 2017, the company had $2.5 billion in annual revenue, ranking it on the Fortune 500 list. This is the 12th year in a row that AutoCAD has been a member of the Fortune 500. AutoCAD is in a constant state of change. It has more than 16,000 customers worldwide, more than 300,000 instructors and professionals of all ages, and more than a million users who are active in some way. Using Autodesk® AutoCAD® software, a wide range of professionals is able to create 2D and 3D designs on paper, using AutoCAD drawings, and digitally on the Web, on mobile devices, and on personal computers (PCs). The current AutoCAD 2018 version is the 15th major release of Autodesk AutoCAD. History of AutoCAD In 1977, Tim Regan, a Colorado-based engineer, thought it would be a great idea to build a computer-aided drafting (CAD) application that was available to every engineer in the field. He hired Paul Schindler, who was a friend of his, to help him build a portable and inexpensive CAD system. On September 10, 1977, the first AutoCAD was released by the Zilog-chip company, the first iteration of Autodesk Autocad, and the first pen-based application. On the next year, Zilog-chip company's CEO Oki Sato and entrepreneur Steve Jobs met with Tim Regan to talk about using AutoCAD. Steve Jobs was the first to join the software company, Zilog in 1979, after he had worked on a digital modeling program for the Apple computer. The idea of a CAD software that would be similar to drafting pencil and paper was a great idea, but it turned out to be a nightmare. The problems started with making sure that the program could work on all the different computer systems on the market. The second, and most difficult, issue was making sure that the product was user-friendly. When Tim Regan had initially started AutoCAD, he had two main goals in mind: reduce the cost and get the program to a point that people would actually use. Tim Regan's company, Autodesk, Inc., was not the first company to use this type of software, but it was one

I just want to get first element of the array. Any help? $backups = array_key_exists('a', $all)? array_keys($all) : null; A: The key is in the array, not the value: $backups = array_key_exists('a', $all)? array_keys($all)[0] : null; array_keys will return the index array as you can see here. Q: If $\frac{\sin x}{x}$ is bounded, then $\sin x$ is bounded If $\frac{\sin x}{x}$ is bounded, then $\sin x$ is bounded. Now, this is what I tried: We have that $\frac{\sin x}{x}$ is bounded if and only if $\frac{\sin x}{x}$ is bounded as $\lim_{x\to\infty}\frac{\sin x}{x}=1$ If $\sin x$ is bounded, then $\frac{\sin x}{x}=\frac{x-x^3+x^5}{x^3}$, which is bounded as $\lim_{x\to\infty}\frac{x-x^3+x^5}{x^3}=1$ Hence, the proof is complete.
