Third-party applications Some third-party applications for AutoCAD use ObjectARX, either directly or indirectly. For example, the open source AutoCAD Viewer is implemented in C++ and uses the ObjectARX classes. With the Visual LISP plugin, users can create own custom functions and workflows using the AutoLISP language.

See also [References](#) [External links](#) [Autodesk Developer Network](#) - With Autodesk's ObjectARX there are now over 50 open source plugins available. [AutoCAD API reference](#) - This includes the specific AutoCAD documentation for each API available.
