I have a JSON as follows: [{"OrderId":12456,"EmployeeId":1,"FirstName":"John","MiddleName":"Loyola","LastName":"Smith","PhoneNo":"97654624","Nickname":"Smitty","NickName":"Smitty","Surname":"Jones","Address":"Room 777","Email":"abc@xyz.com","HomePhone":"792784020"}] My question is based on the OrderId and only the Last name should match. How can I return the LastName field? A: The LINQ statement below is just one way to approach the problem. First we need to get the data into memory. I use the JavaScriptSerializer class to get a strong typed list of your JavaScript objects. Next is a dictionary to store the result. string json = @"[{\"OrderId\":12456,\"EmployeeId\":1,\"3e33713523
