If you use nLite this video will show you how you can create your own image of Windows to reduce your time reinstalling windows. If you have any questions feel free to ask. You can find more details on my website, published:04 Jul 2014 views:70 I recently got a new laptop and decided to give Bitdefender free file locker a try. Let me quickly explain the problems I was experiencing because I know they can be irritating and I hate that they can get out of hand. I have only been using this software for a day and I already tried several solutions to get rid of the problems. A cold start is when the laptop takes some time to reach the desktop. It can be to the point where the laptop just hangs and it takes some time to save everything. The second problem is when the laptop freezes and switches to a black screen. The only way I can get it to boot up again is to turn it off and back on. If you already experience these problems, you will find this part helpful :) Enjoy! published:29 May 2018 views:1272 Bitdefender SecureAnywhere Internet Security 2016 free download - Download: Follow us: Buy books for the bitdefender products you use everyday: Follow us: Bitdefender Internet Security 2017 is a Free version of the very popular security tool. ### What's New In FreeFileSync NLite Addon?

If you want to reduce the time needed for installing your OS you can use nLite addons to create your own bootable image of Windows. Addons are third-party applications developed by other producers than the nLite developers, designed to be included in nLite as addons. They are specially customized so that they can be added to nLite in order to create a preinstall image of Windows to ease a user's work when reinstalling Window on their computer. You just add these addons, create your image and when you reinstall your Windows all your favorite programs will be there just like
