MagicScore Note Free

MagicScore Note is a powerful tool designed to simplify and automate your daily tasks, while enhancing the overall musical experience. Its help comes in the form of an intuitive notation interface, MIDI and text editing, as well as a convenient output editor. MagicScore Note allows users to use their existing MIDI files as a composition and perform them on any device they desire. Simply import them into the tool to see the scores and metadata, while modifying it as you see fit. With the unique features of MagicScore Note, you are able to perform live music notation on a range of devices. A host of apps can be connected to the software to receive audio from a digital keyboard, pad, instrument or computer. The resulting audio can be saved in a text file and exported to a variety of formats, including WAV, MIDI and MP3. New and exciting features include the ability to swap to a "holding" score or to enter the score directly on a device. This allows the user to change the placement of the notes on the stave at any time as long as they have the notes in the right place on their device. Soothing the composer: An integrated metronome can be used to manage timing and beat, while the built-in playback editor can allow users to hear the score with their headphones. A convenient output editor allows users to easily export the resulting score to other music notation and songwriting software. A powerful score editor: MagicScore Note can read and write scores in any file format, including WAV and MIDI. It can be used to manually create new scores and to print to any standard music score paper. Users can play back the score in real time or create a single track per line and playback in a different speed. Natural notation: For users who prefer to view the score in its original form, MagicScore Note supports a variety of ways to display the notation. MagicScore Note also includes a rich library with over 11,000 symbols, all accessible through the library window. Pricing and Availability: MagicScore Note is currently available on the App Store for free, with no ads or in-app purchases. MagicScore Note provides music aficionados with an intuitive notation and song writing software solution ready to assist them in learning about the theoretical part of musical instrument playback. Featuring automatic verification of input information, intuitive note placement and MIDI recording, this application can prove to be a real asset for those who want to create their own compositions. Straightforward usage and built-in tutorials The intuitive interface, alongside the integrated helper and the detailed usage instructions that greet you from the start make the application very easy to get accustomed with, especially for those who have worked with similar software before. Adding notes to the stave is just a matter of selecting the desired symbol from the library and clicking exactly where you want the note to be placed. Alternatively, you can insert notes using the virtual piano. An intuitive music notation application MagicScore Note enables you to number measures, adjust spaces between them, insert offsets of staff, chord names, guitar diagrams, note accidentals and write lyrics, comments or references above each note. You can set the tablature, the scale and the staff interval, choose the string tuning from the available templates and even assign notes to a second voice. The integrated MIDI recorder features a built-in metronome to help you manage rhythm, while player enables you to listen to instruments separately or the entire song. Switches focus to music composition With its intuitive editing tools and score printing capabilities, MagicScore Note is a must-have tool for all music composers. Its rich toolset allows them to focus on their music rather than the accuracy of notes placed on the stave.
