## Men Of War Vietnam V 1.00.1 Full Trainer ~UPD~

[Download](#)

Here is my contribution to version 1.0.0.1 of Vietnam War. The table contains a script with the following functions: - Health; - Strength; - Attack; - Damage to the enemy; - Endurance; - Resistance; - Evasion; - Weapon damage; - Armor damage; - Attack damage; - Damage protection. When you click on one of these tags, you get a table of those columns. You have to use these values and create a table that looks like this (you can change the table however you want so I don't have to do this): This is a really simple table - the table was generated with PHP. But this is not the end; this is just the beginning.
