The Progress of Algorithm Intelligence [pdf] brudgers ===== brudgers Abstract: In this paper, we characterize the major advances in the field of algorithm intelligence over the last decade. We identify five broad areas of recent progress: (1) case study based algorithm tuning, (2) model based algorithm tuning, (3) IID algorithms, (4) reinforcement learning, and (5) progress in managing algorithm intelligence. Each of these areas has experienced broad increases in the utility of the approaches that comprise them, and although our framework is not quantitative, it allows us to make some credible predictions about where the field is headed in the next decade.
