SQLite to Excel is a great tool to migrate your SQLite database to Microsoft Excel, which can be opened and manipulated by almost anyone. With SQLite to Excel, you can bring content from a SQLite database to Excel, in just few clicks and in a way that is secure. SQLite to Excel Features: Works with Microsoft Excel versions 98, 2000, XP, 2003 and 2007 Quick and secure conversion As stated above, SQLite to Excel is a fast, secure way of converting your SQLite database to Excel. It uses direct SQLite connections and does not require ODBC or other third party software. Logging/Tracking SQLite to Excel has a logging feature which keeps track of the actions taken. Should you require, you can log all actions taken, which might be useful for debugging purposes. The logging feature has three options: - Log all actions - Only log startup, connect and disconnect actions - Disable logging Once you are happy with the logging options, you can save the logging settings to the database. File Output Options SQLite to Excel allows you to choose the output format. The first option is to save the data in a spreadsheet, the second option to save the data in an Excel template and the third option is to export the data into a CSV file. Database Splitters SQLite to Excel has support for splitting the database into multiple spreadsheets, should it contain too much data. This option is available under the folder options. Installation Details No installation is required and SQLite to Excel is portable. Its installation is just a matter of copying the folder to your system's folder. Aerial Delivery With the free version of SQLite to Excel you will be able to migrate your database, in a secure way, to Microsoft Excel. The software is portable and does not require installation.
