SoundEditor

The world's best-selling sound effects software, Sound Editor, has evolved and is now available as Sound Editor Elite. Audio editing and producing has never been easier and it's a snap to work and create great sound effects with all of the professional editing and production tools at your fingertips. Take for example, the intuitive controls and one-click solutions for everything from recording, recording audio directly into multiple tracks (such as vocals, instruments, and ambience), editing your audio into 3 dimensional space, creating bounce-back, drilling, stacking, chopping, pitch shifting, mixing all within the intuitive interface. Powerful and intuitive controls for audio editing and creation! Audio effects - Sound Editor gives you a total of 96 Audio effect plugins with over 5,000 possible combinations of your sounds, which means you can create your own unique plugins in just seconds. Bounce Back - Play your audio tracks into the environment and record audio from external sources. Simply choose the source and place the audio in the picture. You can even edit the audio while it plays. Drilling - Create perfectly matched audio background sounds with the Drilling tool, which lets you insert any sound into the background, including background audio and ambient noise. Mixing - Use Sound Editor to mix your audio up to 10 tracks into a beautiful 4-channel sound recording. Record from multiple devices, such as a microphone or a CD and mix up to 10 audio sources, even as you record. Direct to tracks - Create a new track that you can use to record directly to with the audio recorder included in Sound Editor, and save the audio to a WAV file. You can also record directly into multiple tracks (vocals, acoustic guitar, drums, brass, etc.) Mixing - Take multiple audio tracks and mix them into one. Apply effects to your audio, such as adding reverb, filtering out frequencies, or adjusting volume. Pitch Shift - Change the pitch of an audio file without changing the frequency. Use Pitch Shift to create a new vocal track from an audio track, or to create a completely new audio file. Recording - Record any sound with Sound Editor's built-in audio

recorder. Use it to record sounds from any audio source, even as you record. Reverb - Create audio that has a defined amount of reverberation using the Reverb tool. Chorus - Chorus is the sound-enhancing tool that will make your sound track shine. Create any sound effect imaginable and apply a chorus effect to 09e8f5149f
