Generate Random playlist on the fly. 6.

Easy search function to search your music

library. 7. Play controls:

Stop, Play, Pause, Next,

Previous. Requirements:

Microsoft.Net

Framework 2.0 -

PDA/laptop with
standard Web-browser.
NIK Software -
FLIidPlayer is a multi-
format free player that
supports Windows Media
audio/video and
DVD.FLIidPlayer allows
you to play all the media
formats that your PDA,
CD-ROM and even any
PC can read. FLIidPlayer

can play video, audio and data (including MP3, WMA/WMV and SMIL) in different formats and can even display an embedded font that allows you to preview a full-page website.

FLlIdPlayer can manage a huge amount of files or play your media files in the background. It can

also play your media files directly from FLIidPlayer application without reading them from the CD/DVD.

Features: Enjoy all the formats FLIidPlayer supports in stereo, 5.1 and 7.1. FLIidPlayer has a huge amount of playlist that you can edit as you want. FLIidPlayer is

intuitive and easy to use. FLIidPlayer's playlist allows you to: * Play directly from FLIidPlayer in the same playlist. * Read a file or a folder from your PDA and queue this file for later playback. You can also choose to play the next file in the queue. * Import, export and

synchronize files
between your PDA and
PC. * Play from
background. *

Transcode: FLIidPlayer
can not only play but also
can transcode/compress
your media files to save
your hard drive
space. FLIidPlayer can
also play audio and video
in Real Media format

and save time when you
are watching or listening
