The main screen of the program displays the list of the most important applications found on the Windows 8 tablet. These applications are not listed in alphabetical order, but they are displayed according to their compatibility with the Windows 8 tablet. Therefore, it is necessary to sort the list by clicking on the column that contains the names of the applications. You can also download this program to other Windows 8 tablets. You can do this by typing the name of the program into the search box located at the top of the main window and pressing the enter button. If the name is found, then you can download it. The other option is to find the program you want in the list of the most important applications.
