During the press conference for the release of World of Warcraft: Mists of Pandaria, Blizzard CEO Mike Morhaime stated that the company had decided to drop the competitive aspect of the game. This would essentially mean that when people become engaged in World of Warcraft they would be playing with everyone else. The issue is that people have been talking about the competitive aspect of World of Warcraft for a long time. The company has even dropped hints that they were planning to go this route. They did so at the Beijing Games when they stated that the World of Warcraft was a game of friendship. This was met with backlash. The line was seemingly taken out of context. People were up in arms over the wording being used, and some started to get offended
