What I want is to import a video and add a title in the beginning and an end tag at the end. Is this possible in Xcode, or should I use an alternate app? A: Yes you can do this with iMovie, it's free too. However, since you are creating an app, using the objective C/C language, Apple offers an app called Haneke it's free as well, but again you are doing it in Objective C. The invention relates to a method of analyzing data and, in particular, to a method of analyzing data obtained from a series of peaks, each of which has two values corresponding to a first and second state of the sample at one or more times during the measurement period. Each of the values is affected by noise, and the noise of the values are correlated from measurement to measurement. A common measurement procedure involves the measurement of a sample substance, such as a gas or a liquid, by monitoring the internal concentration of the substance in a process line or other container, as disclosed, for example, by U.S. Pat. Nos. 6,397,716 and 6,912,935, which are incorporated herein by reference. Such measurements are typically performed on a continuous basis, and the results may be used to, for example, control the operation of a machine, monitor the operation of an entire plant, and/or monitor the progress of a manufacturing process. There are several ways to make these measurements. One way is to measure the internal concentration of the substance in samples as they pass continuously through a process line or other container. The concentration of each sample is compared to a reference concentration, and an alarm signal, or
