AutoCAD has its roots in the Autocad 2000 program, the first software tool in the Autodesk portfolio to offer the capability to work collaboratively with multiple users on a single project. Autocad 2 was released in 1987, with its built-in color graphics user interface (GUI). Autocad 3, also released in 1987, featured a more streamlined user interface and the addition of a model-based drawing environment. In 1990, Autocad 4 was released as a desktop application for microcomputers, with a transition to a client-server model in 1991. Autocad 5, the first version of the AutoCAD software to incorporate CAD standards, was released in 1993. In 1997, Autocad 6 was released as a client/server model, using a technology called Windows for Workgroups (WWN), with higher-resolution graphics and a new GUI. The final release of Autocad 6 was 2000. In September 2002, Autodesk announced the re-introduction of Autocad as Autodesk® AutoCAD® Software, a license-free, fully functional Web-based edition of the tool for online collaboration. AutoCAD Web turned the Web into a platform for the exchange of data among a team of designers. As software, AutoCAD has undergone several updates and upgrades over the years, with the latest version, AutoCAD 2018, released in August 2018. AutoCAD 2018 is available for Windows and Mac. History Autocad started as a small program to edit engineering drawings created in the early 1980s. The initial version was for the Apple II. However, it was a commercial failure. In 1982, the Autocad 2000 program was created to address this shortcoming. Its release was considered a commercial success and Autocad is now the leading CAD program. Autocad was first released in December 1982 for Apple II, with its first computer-aided design (CAD) application that ran on computers with internal graphics controllers. The drawing environment was designed for users with basic drafting skills. The original version was able to create rectangular, circular, polygonal, and arc-based and freeform surfaces. The 2D elements are aligned, as well as most of the 3D objects such as solids, shells, and cones. The unit cost of production was about $4,000. Autocad's growth was rapid. The first feature that users of the application

Technical support AutoCAD technical support can be arranged either directly with Autodesk (via phone or Live Chat), or through Autodesk's authorized resellers. Although the latter option does not include repair, the customer can contact Autodesk's warranty partners, such as ServiceMax, for technical support. Post-release service AutoCAD on-premises installation has traditionally provided a means to upgrade to the latest major release of AutoCAD by downloading the installer package for the next version from the Autodesk website. This is still the method of choice for the vast majority of AutoCAD users. As of AutoCAD 2014, software licenses for AutoCAD can be purchased directly from Autodesk in three options: Software license. Purchasers of a single-user license can download software updates and new releases of AutoCAD without requiring additional licenses. A premium version of AutoCAD is available for companies with more than two users that provides access to premium content including AutoCAD Web App and online help, and access to updates for all current releases of AutoCAD. A one-time per-machine charge is applied to the total license. Volume license. A volume license allows users to distribute AutoCAD to any number of users, or even more than 100, without requiring a license for each user. The price of a volume license is determined by the total number of users and requires up front payment. Subsequently, users can upgrade to newer releases of AutoCAD at no additional cost. Upgrades to AutoCAD 2017 or later require the purchase of a new license. Maintenance. AutoCAD Professional is a subscription-based license, in which subscribers receive updates and new releases of AutoCAD at no additional cost. Advanced A number of add-on applications are available for AutoCAD. Examples include: 3D Benchtop - 3D topology-based workflow, feature-based constraints, context-aware navigation, 3D text, and feature collaboration. Bentley MicroStation (cannot be run on the cloud) - A raster graphics software platform. Breakout - an add-on application for AutoCAD and AutoCAD LT that brings easy to use information to speed up and simplify the design process. Graphisoft Raster Design Suite Open Design Alliance - the largest 3D modeling application marketplace. Turbo Viewport - a tool to allow a virtual 3D window to float ca3bfb1094

The AT&T National Coach of the Year Award is presented annually to the top women's basketball coach in the nation. The winner will be announced at the conclusion of the 2017 NCAA Division I Women's Basketball Championship, which will be held at Bridgestone Arena in Nashville. The ceremony will be held on May 24, 2017. "The candidates for the 2017 National Coach of the Year presented by AT&T deserve this honor," said John Cohen, executive director of the Association for Women's Basketball Coaches. "For the past 12 months, they have led their programs to new heights, and they are all deserving of this honor." The contenders for the National Coach of the Year presented by AT&T are: Warlick, who took over the program in 2012, has led UT to a 183-40 record, a school-record six straight NCAA Tournament appearances and the program's first-ever Final Four appearance. In the last two years, the Lady Vols have posted a combined 24-2 record and claimed the SEC regular season championship both years. Warlick is a two-time ACC Coach of the Year (2010, 2015) and a three-time winner of the Associated Press Women's College Basketball Coach of the Year Award (2010, 2015, 2016). She is the only coach in ACC history to lead her team to the conference regular-season championship and the NCAA Tournament in back-to-back seasons. "I am thrilled to be one of six candidates for the 2017 AT&T National Coach of the Year presented by AT&T," Warlick said. "I want to thank my family, my staff, the University of Tennessee, the amazing fans, and all of our student-athletes for their continued support
