In Autodesk AutoCAD make sure that you check the option "set a key for the Autodesk Autocad" in the "view" option A: You do not need to use any key generator. If your registration has expired, just download a new version. Otherwise, you have a serial number or product key that you have to copy to the software before the registration will be accepted. You cannot use any generator to obtain this number, you have to register the software manually and choose what serial number you want to have. Q: Typo3: Headline Typo3 Page Template I use Typo3 7.6.4 and I want to add a headline to my page template. Here is my Content Element:

What's New in the AutoCAD?

Customize the output of markup features such as image previews, footer notes, and prompts by choosing predefined presets or creating your own. You can create custom presets to apply to specific projects or file types. Manage comments, attachments, and other files to customize how markup is applied to a drawing. View feedback in the drawing browser, which allows you to easily send feedback directly to the drawing in a new tab. Add, move, and copy comments and other files to drawings to reorganize your comments and markups across your drawings. A new Import command and import button in the Document panel will speed up the process of incorporating feedback from online sites and PDFs. A dialog box will provide instructions on the types of files that can be imported into a drawing. When importing from a PDF, users can choose to import only the drawings in the drawing. Or, they can choose to import a detailed page view or the entire file. Markup Changes (previously AutoCorrect): Show changes to the original drawing on the screen when your markup creates a new feature. Change the background color of objects in the markup that have changes. Synchronize changes to the markup when you update the original drawing or create a new drawing from the original drawing. The Sharing/Comments/Pin option for annotations allows users to use those options when working with comments, so the comments and annotations stay associated with the original drawing. Add shared comments to individual elements in the drawing. Create independent snapshots for users working on a single drawing and sharing comments, images, and drawings. When comments are applied to a drawing, groups of comments are now deleted when a single comment is deleted. You can create new groups for comments to manage large groups. The Undo command can now be used to navigate through drawings, markups, and comments. An updated Markup Explorer to help users navigate the markup in their drawings. Commenting Options: Extend annotations by expanding and collapsing the annotation area on drawings or model space. Collapse the drawing on the Docking window to make room for more comments. Collapse comments, annotations, and markups to make space for more content in a drawing. Quickly collapse and expand comments, markups, and annotations. Add comments and markups
