This program will work in Windows 95/98/NT/ME/2000/XP. Computech MP3 Locator Script Description: This is a small application that checks your computer for active open TCP/IP connections and displays the list in a nice user-friendly tabbed window. The application was developed to be a useful tool for network administrators of small and large networks. A more advanced version is also included, which can be used to run it with administrative rights. More information and download instructions can be found at From February 2006, this application can find all open TCP connections on your computer. So you can be aware of the connections that are open. With a second click you can close these connections. You can also filter the connections, so that the connections on certain ports are only displayed. Please note that there can be the following restrictions when using this software: - the files needed to run this software are available as 'external tool' (- this software is only allowed to be used if the computer has admin rights - the number of running processes may be increased when you use it. This means that processes that you are not using may be stopped - if you start this software, a notification might appear on your desktop. To prevent this from happening, the following action can be done: On the System Tray, right-click on Network Scoped View and press "Turn Off System Tray Notification". - if you wish to start the second version of this software with admin rights, click on the 'Use Admin Rights'
