[URL= [Pic]The role of alpha-tocopherol in lipid peroxidation and DNA damage by methylglyoxal. alpha-Tocopherol is a potent antioxidant that protects cell membranes from lipid peroxidation. Its activity is sufficient to suppress free radical formation and DNA strand breakage in isolated rat kidney nuclei caused by methylglyoxal, the hemimethylglutarate precursor of the advanced glycation end product glyoxal-lysine dimers, but not by the common reactive carbonyl compound methylglyoxal itself. This protective effect is accompanied by the inhibition of GSH consumption and by the initiation of a DNA oxidation process. We propose that the alpha-tocopherol-dependent reduction of methylglyoxal-mediated lipid peroxidation in cell membranes and of nucleic acid damage in the nucleus is due to the ability of alpha-tocopherol to reduce these species, which become activated by methylglyoxal, to their parent, unreactive forms. In addition, the game feels like a beautiful mobile port of an older RPG that was beloved by many in its day." - Gamereactor, 2018 "The characters are hilariously bad-ass, the world is a flurry of fun, the music is the perfect percussive background to the action, and the game is packed full of running, fighting, and shouting. Rise: Tarnished is a great RPG you should play once." - Hardcoregamer, Gamereactor, 2018 "Even if you never played a JRPG, the game is well worth your attention." - Appznews, 2018 "It's got a good atmosphere of a game where your friends will join you at all times." - Appspy, 2019 "Rise: Tarnished has a great series of long, gorgeous battles and the promise of some fantastic world building around you when you're not engaged in combat." -
