This was a game that I played on X-Box, and had an infinite character progression. No limit to what I could carry. My max weight was what I figured was appropriate for my class. Joking about it is like trying to have a conversation about something you care little about. You may think it's funny to know how a particular issue or point of view play out in a game, but there's really no point when it's all so stale and stagnant. I just don't know how you can bear to touch this franchise, or any other, for that matter. As I just posted elsewhere, I'm really not looking for a mod. I want a new game entirely. -- By GOA1The wait is over! The actors, actresses and creators return for the 25th season of the beloved cult TV series. Set in a world where Nazis commandeer flying machines as airborne killing vehicles, the show revolves around a band of German fighter pilots who are charged with protecting the skies from any nefarious attacks. The pilots must link up with the Luftwaffe to track down mysterious attacking forces. And they must connect two charged air batteries in the Alps to kick off each mission. It's a modern 'Gilligan's Island' set in modern high-tech Germany. The show puts a nerd spin on its mythological characters, and the jokes are more down to earth, and more recent. A lot of it will be based on the actual events of World War 2, but the pilots will also have to navigate very, very old-school technology, including old-school TVs, radios, and typewriters. And their German names are apt. With more than eight original seasons under its belt it's called 'Der Dicke Handschuh', loosely translated as "the fat handed glove", the show's cheeky creators having been released from the confines of a big-screen format. Season 1: 1. Der Dicke Handschuh 2. Die Dame vom Seitenteil 3. Typewriter 4. H.J. 5. Lebensraum 6. Der Tempel Season 2: 7. Dommi 8. Die Lärcheck-Unfall-Saloon 9. Abschied 10. Kaboom 11.
