The new fantasy action RPG allows you to rise and become an Elden Lord. Elden is a fantasy action RPG that takes place on the continent of Thalanon. The world has been divided into provinces, and within these provinces there are countries. Elden has been the ruling power of these countries for ages. Elden is divided into five rings, each of which has a different influence in the world. In these ancient times, when the gods had disappeared, these five rings became the only remnant of their power. As the power gradually left the rings, they became divided into different nations. The five rings are: —the lands of the Shadow, situated in the northeast. In this realm, ancient evil shapes the world. —the lands of the Ruby, situated in the south. This is where the gem-goddess Alisha gave birth to her and where her power dwells. —the lands of the Brass, situated in the north. This is where humans dwell. Alisha asked the goddesses Dana and Illoria to protect the Brass Kingdom. —the lands of the Stone, situated in the west. This is where the god Vestur started living and where he established his power. —the lands of the Iron, situated in the east. This is where the goddess Forreta received divine power from the king of the gods. The five rings all have their own power and their own destiny. Their combined power has not changed in thousands of years. Legend says that once the Five Rings re-unite the five rings will be reunited again. Still, every ring has its own way and its own belief, and each province is a place where each ring's power is at its strongest. After many years, on a cold night of autumn, a vision appeared in the north. At the same time, in the corner of the south, another image arose. Three different visions: They were in the east, west, and center of the lands, the lands of the Iron. At each location they were the Elden Lord and his servants. They both had the same attire. The two Lords were called "The Tarnished" and "The Tainted". After they said goodbye, the visions disappeared. A tiny circle of light appeared in the northwest. The color of this light changed from yellow
