Date to String like DD, MM, YY using a CTE I need to convert from date format to string like 'DD', 'MM', 'YY' using a CTE. Here is my code: select CONVERT(varchar(10), CONVERT(date, DateValue, 103),103) as 'DD' but this gives me date and I am trying to convert that to string from date format.

A: You can do this with conditional aggregation. declare @d as date = '2017-04-10' select datepart(dw, @d) as [DD], datepart(mon, @d) as [MM], datepart(yyyy, @d) as [YYYY] Demo
Note: If it is a string, then we can use try_convert(), which will return a string or null, and then conditional aggregation will handle it as varchar.
declare @s as varchar(10) = '2014-11-17' select

try_convert(varchar(10), @s) as [DD] ,

Hey! It's me, Matthias, the creator of DEICIDE! This is our first game, to be honest. You may have played something like DEICIDE before, at some point. It might have been some sub-franchise of DEICIDE, I won't lie. You played a Deicide Game before?

That would have been nice. What is DEICIDE? DEICIDE is a sci fi/fantasy themed 3rd person team arena brawler featuring fast paced gameplay and unorthodox character designs. Grab two of your friends and play in 3 versus 3 last humanoid standing arena. What is your goal? We want to be remembered as the first sci fi/fantasy themed DEICIDE. What have you done so far? Some shitty sprite art, some shitty writing, and no trailer at all. Our first game got released on iOS and was pretty fun to develop. Who knows what else we can do, considering we just started. Have a lot of fun, join our Discord server and say hi. Screens 2018-12-18 2018-11-21 Why DEICIDE IS GREAT Deicide is a sci fi/fantasy

Bridge Constructor Stunts is a games-
about-building-bridges, which is
reminiscent of game-making series
Beyboard Studio. In this game, the
player is given a set of stones and a
roller to build a road to the goal.

Bridges are somewhat similar to
puzzles with missing small pieces, but
instead of empty spaces, they're full of
holes. These holes are of several
different sizes and shapes, so they can
be used to guide the stone through
them, thus creating a successful

bridge. The user is also given an endless supply of stones as well. This was the first game to be created as part of the Ludum Dare game-making competition. The soundtrack was composed by Keiichi Ishidate.
