When it comes to the gameplay, it's not just the animations that are in motion, but the ball. Players are able to maintain control of the ball with a new new Attitude Adjustment feature. Attitude Adjustment allows for the ball to maintain its speed and spin depending on the player, use the 'deflection' feature to bend the ball, have the ball deal damage when it receives contact or have an unpredictability factor if the ball passes through a defense. A new 'Passing Projection' allows players to have an accurate pass prediction - based on the location of the player and the intended receiver. A new 'Defense Reactive AI' ensures that defenders react to both the initial pass as well as the kick off, allowing for some impressive, but predictable defenses. There is even more to the FIFA Interactive Universe. New rewards will help players unlock iconic Ultimate Team content. Winger boosts in Ultimate Team
