"The HyperMotion technology in FIFA 22 allows us to create fluidity and movement on the pitch and deliver on our mantra: "Speed is the new engine," said Executive Producer Oliver Kreylos. "Getting the ball from one player to another feels more natural and easy, along with the real player movement, reactions and animations. We're really excited to see what our fans think of this new technology. It's already off to a great start in real-world testing." There are 4 improvements in the gameplay for FIFA 22: Faster Ball Movement The ball in FIFA 22 moves much faster and allows passing options more often than in past FIFA titles. Complex Ball Controls Control the ball with a greater level of precision. While you can choose between Precision and Controlled Skill, the former lets you move the ball and tackle with greater speed and moves the ball across the pitch in the most realistic way, while the latter allows you to control the ball with precision and provide extremely accurate passes. Real Player Movement The ball moves in and out of play more realistically. Better Ball Size and Flight Impact The ball moves more realistically in and out of play, making it easier to keep possession in tight areas and giving it more stability at different speeds. FIFA 22 also features eight new Player Attributes with the addition of six new Team Tactics: Skill level and Visibility Control the ball through 4 Skill levels: Beginner/Intermediate/Advanced/Expert - Each level moves the ball differently, with beginner being the slowest and expert being the fastest. Skill levels differ by difficulty and range from making head and chest passes to fast diagonal and long-range passes. Position Control the ball with height, width and depth-making it more realistic and allowing you to put the ball where you want, rather than having the ball land at a certain height and distance from the player. First Touch Control the ball before and after contact - With first touch, ball-watching and quick recovery better. First Man Control how you play: depending on the situation you can play to

the first man, the second man or the first and second men. Fast Forward Control the player's positioning after the ball has been played. Fast Forwarding can be turned on and off with a tap of the left and right stick. Deflection Control if the

What's new:

- **New rating enhancements.** The difference between the best and worst is greater than ever before as players from around the world improve their ratings to gain statistical advantage through gameplay, including: speed and agility ratings, attack, power, dribbling, shooting, crossing, shielding, and ball control. With the new “goal conversion rating”, your goal-scoring instincts can give you a distinct advantage in the game.
- **New Tactical Defending System (TDS).** The new Tactical Defending System gives you a wide variety of ways to approach a match - from crazy, 9-man man-marking, to positional defensive coverage. The tactical mid-match indicator demonstrates how much time is left in the match, and allows you to improve your game by adjusting your defensive coverage or adjustment accordingly. Adjust your defensive support to help your team win the match, then capitalise on the opponents mistakes and take advantage to secure victory.
- **New Agent and Friend Challenges.** In addition to the familiar Player Skills challenges, improvements have been made to Friend Challenges, allowing you to advance to ranks with friends. Optimise your Friend Challenges to win Guest Passes, multiplayer coins and other prizes. Each Friend Challenge award ranges in value from 5 Player Abilities to special team events.
- **Best Finishing and Creativity innovations.** Tackle more, dive more and score more through multiple innovations to the Skill Moves, Off the Ball Control, and attacking framework. Optimised your play style with the Best Finishing controls for better handling, quicker passes and short headed shots. Let your creative juices flow as you use game-changing humanization elements, including all-new Skill Move and enhanced eXtra Ball Control controls, to complement your teammates with astounding new moves.
- **New Player Personality traits.** Each has been tweaked and better defined, in-keeping with the enhanced personality

traits in the above and more than 10 new Player Creation Methods. You'll now have more variety in creating the players you play with, including new hairstyles, hairlines, and tattoos.

- **New Player Injury System. This second revolution in injury modes builds on a series of usability enhancements including new human proportions and critical collisions that allow for a more realistic and authentic injury system where players can suffer multiple injuries simultaneously.**
