In addition to the game's existing brand of gameplay features and enhancements, every game-changing play, tackle, and dribble will be made possible through the use of this motion data. Below we've compiled a list of some of the key in-game changes due to this technology.

On-ball Performance With the increased use of on-ball movement in FIFA, players will perform a series of increasingly more effective movements to either burst past an opponent, work through multiple players, or make a single powerful pass. FIFA 22 introduces a new "get up and go" action where players move to a nearby space and initiate a sprint and evasion action. This new action helps players "get in position quickly before starting their sprint" and helps build momentum towards a sprint or open up new passing options. This new "get up and go" action begins with a player sprinting towards their target with two short animations, and then conducting evasive actions when their opponents catch up. This action is new to FIFA 22, and we will be comparing it directly to the "get up and go" action in FIFA 20 to see how it compares.

YOUR COMMENTS: How does "get up and go" in FIFA 21 compare to "get up and go" in FIFA 22? What do you like/dislike about the "get up and go" in FIFA 22?

Hit and Run Dribbling FIFA 20 introduced hit and run dribbling. Now players can dab the ball out, kick it long and drift the ball wide to create more passing options. FIFA 22 introduces an "evasive release" to help players avoid the tackle. When players are under pressure, this new action will help them avoid the tackle, and get into a space to dribble away from pressure. This new release starts with a player sprinting towards the ball, in the opposite direction of their flight path, and conducting a low-path evasive action when their opponents arrive. The player will be moving at a higher speed than usual. The evasive release animation is added to the dribble out animation in FIFA 22. This will help players adapt to the new dribble animation and appear less unnatural when dribbling. FIFA's on-ball, more physical gameplay will be a major gameplay development in FIFA 22.

All Reviews are my own opinion, which I will attempt to keep detailed, impartial, and spoiler-free. Legend Flagship Series Classic Series Conquer Series Top Games This Week You can see the current top 5 rankings here. Why I didn't write a review for a game or game mode? The Review Guidelines can be found here. In summary, a review for a game or game mode must be longer than 100 words, include gameplay with commentary, be posted on the Xbox One, PS4, or PC platform,

and be posted before the game or game mode in question releases. If you can't do any of those things, you might want to wait for it to drop on your platform before looking at reviews for games that have already dropped. I know it's asking a lot, but if your game is within the past week and you can't post a review, maybe you can still get a quick look at some of the new roster play? I won't apply the same standards to game mode reviews, but a lot of times game modes are less than 100 words and you don't get to see gameplay with commentary. More recent game modes will usually appear in the "Latest additions" list of the blog.
