Player Impact: The most realistic representation of a football player ever Immersive Player Experience: Take virtual control of your very own superstar Enhanced Team Behavior: Combine your favorite player with up to 99 other players Improved Player Models: Every football club created in FIFA 19 has been reworked for FIFA 22 New, Dynamic Lighting and Shadowing: Intense and realistic lighting and shadows are all part of the FIFA 22 experience Improved Player Accuracy: Ball skills are recreated more realistically and your final pass can be a perfect interception Improved Player AI: Teams become smarter and can simulate what they need to do for the game; for example, pressing into a player's position and anticipating the ball's movements Improved Physics: All ball and player movements are controlled as if they were real movements in a real football match, allowing for a more realistic feel Improved Reaction Times: Players react instantly to the ball to give a more lifelike experience FIFA 22 introduces "HyperMotion Technology", the most expansive real-time motion capture technology in the history of the series. HyperMotion technology combines all of the player movements captured by the motion capture suits worn by 22 real-life pros playing a complete and high-intensity football match into one game. Players can be dribbling, through balls, passing, shooting, making volleys or crossing, in an extremely high-intensity, high-volume football match with a complete realism that has never been seen in any football simulation. Striker Name: Playstation™ 4, Xbox One & PC Striker Name: Playstation™ 4, Xbox One & PC Overview FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data captured from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. A unique feature of the data captured from the 22 real-life players is that the game engine will also use the data to reproduce the actions of the player with the most "HyperMotion" characteristics. In FIFA 22 the "HyperMotion" actions are displayed on the pitch to the point where the player with most HyperMotion attributes will break the ball off the pitch and kick it back to the pitch, before finally starting to play the ball.
