\* \*\*Adobe Photoshop CS6:\*\* This book is only about version CS6. \* \*\*Adobe Photoshop Lightroom:\*\* Photoshop's photograph library management software is Adobe Lightroom, a free alternative to Adobe's popular Photoshop Elements and Adobe Camera Raw, which is only available as part of Photoshop. \* \*\*Adobe Color CC:\*\* This book uses the CS6 version of Adobe Color CC, which extends the built-in functionality of Adobe Photoshop and Adobe Camera Raw with a free color-management toolkit. It enables you to correct, balance, and control the colors of your images. ## A Word on the Special Features of Photoshop The imaging program Photoshop has five features that most of us are not aware of. Let me quickly introduce you to these features. \* \*\*The Select command:\*\* The Select command enables you to choose the pixels on an image. It is an element of the Magic Wand tool, which is discussed in Chapter 5. \* \*\*The Layer Lasso tool:\*\* The Lasso tool makes it easy to grab and move around the pixels in a digital image so that you can mask and remove them. You can get to know the Lasso tool in Chapters 12 and. \* \*\*The Content-Aware Scaling tool:\*\* The Content-Aware Scaling tool enables you to change the size of an image on the screen. Whether you use it to make an image larger or smaller, it's a very helpful tool for adjusting image size, and you may come to appreciate its utility in Chapter 14. \* \*\*Save for Web:\*\* A feature called Save for Web enables you to save images for use on the web. You can read more about this in Chapter 14. \* \*\*Send to Photoshop (or Camera Raw):\*\* This feature enables you to save your RAW images (see Chapter 6) to Adobe Camera Raw for further editing. The Select, Lasso, and Content-Aware Scaling tools are some of the most commonly used features of Photoshop. If you're new to using Photoshop and its various tools, I recommend that you familiarize yourself with them before reading this book. The best way to familiarize yourself with these features is to watch some video tutorials available at `www.Adobe.com/photoshop`.

Usually we refer to Photoshop CS5 as Photoshop. If you don't need the optional modules like Camera Raw or Lightroom, you can use Photoshop CS5 and get the same features in Photoshop Elements 10. We're going to share best tips that will optimize your work with Photoshop and Photoshop Elements to get the best results. 1. Prepare your pictures properly If you have to edit only one picture, a short preparation time won't take too much of your time. On the other hand, if you have to prepare a lot of pictures, save the time in the preparation stage. You don't have to spend too much time preparing images for editing. Start simple, either by cropping or resizing. Photoshop is capable of cropping the pictures or resizing them to your desired size. Preview the pictures before you start cropping and resizing. If you find the size of the picture is too big or small for your needs, you can crop it before you start editing. Cropping is usually faster than resizing images. But when you are doing several resizing images, you don't want to crop them all. You can crop them later if you find that they are too big or small for your needs. If you are modifying multiple pictures, it is a lot faster to resize them all at once. If you have to resize many pictures, scale them to the same scale, then the merging process is faster than resizing each picture individually. 2. Automate repetitive tasks with Actions Photoshop provides many features which allow you to automate common tasks. Usually these tasks include: Adjusting the image's brightness, contrast or saturation Cropping or resizing the picture Adding the effects you want to apply to the picture (fading or watermarking) Combining different pictures together Deleting any part of an image Automating repetitive tasks in Photoshop will save a lot of time. Also, if you are a beginner, this is the best way to become faster with the Photoshop. To create Actions, you have to do a lot of trial and error. With the help of the time-saving Actions, you can quickly apply the effects to your pictures. Also, you don't need to manually switch the effects on and off all the time. You can do any combination of the operations you want. This could be cropping, resizing, fading,

President Trump bashed the New York Times, again, on Monday night, urging his supporters to "get their act together and vote" for Republicans for the midterms. During a rally in Erie, Pa., Trump said, "The [New York] Times has said very negative things about me and my administration and we're fighting back." "Right now, I have to say, we are winning," he added. "But I have to say, get your act together and vote. The election is coming up. We have to get out and vote." Trump bashed the "fake news" media for its recent report — discredited by fact-checkers — that he directed Michael Cohen to lie to Congress during the ongoing investigation into Russian interference in the 2016 presidential election. The president has been in a barrage of headlines lately, including "Trump says he had no dealings with Russia," from reporters as well as cable news commentators. The president on Monday said that he takes "pleasure in correcting the record." "You know, just in the past 24 hours, I think I had three or four, three major ones, I think, two hours, three hours, on, on, on the fact that you guys in the press know absolutely nothing. I mean, you know absolutely nothing. And you shouldn't let it be. And you know, you should show the public," he said. "I've had tremendous success in the things that I've done," he concluded. "I've accomplished more, much more, than any politician in the history of politics. Not only in a short period of time. I've done more than most people ever done in their entire life, and I'm only 1-2 years out of office, but in that short period of time, I've done more than any president ever. I mean, nobody would have ever believed it. I did. And I did it on a scale that nobody's ever seen. And I'm only one year out. And it was an incredible landslide. I beat Hillary Clinton with almost 300 million votes. Hillary Clinton beat me with almost 300 million votes. Okay? So that's tough. But, you know, we have to do a great job in this election. We have to get out to vote. We have to get out and vote. But we have to get out and vote in a very important way."Polyamory Polyamory (from Greek Πολυ
