JRiver Media Center lets you control all of your multimedia files from anywhere in the world.Q: How can I get file length without opening the file in Java? I want to get the length of a file without opening the file. I need to get the number of bytes the file is. Does java have a function to do this? A: If you open the file at all, you should open it for reading. The act of opening the file shouldn't read a lot of data, and so I'm presuming you're looking to do something like seek to the end of the file if
