First we were just two boys sitting down in a living room together, playing video games. And now? – Now... Oda has created a game so finely crafted, so psychologically complex, so engrossing you'll be talking about Continue? long after the game is done. What will you choose? Life. Or Continuity. Player 1 Players will be matched in a year's worth of specific activities and relationships with another person. Depending on the choices you make, characters will act differently in the future. The game gives you the flexibility to change history. The one who is played will decide: – Who ends up in jail? – Will one of the characters act differently? – Will there be an accidental suicide? – Will the gang members join the police force? – Will the characters be able to attend their own funeral? – Will the character die in an early car crash? Players will need to decide if they want to save everyone, save some or sacrifice certain people. All these choices will affect the future of the game and your own life. More and more choices will be given as the year continues. Playable characters will come and go, but the choices they made in the past will stay. Will the players live out their own life in this ongoing story? The decisions made here will change everything. Player 2 – Who is the better male? – Who will be more compassionate? – Who is more responsible? Combine them in a story and then play it out. Whatever choices you make on your own and based on your own life, you'll be the one in charge in this story – for better or worse. The game is actually not that easy

to finish. Players that choose to let the entire plot play out, will face the tough decision of whether to use that advantage to save or sacrifice people. Imagine playing out your own life from the start and ending with a life you made for yourself. This is what you can only do if you choose. Continue?9876543210 creates depth and meaning by allowing the players to make the tough decisions based on their own life. Depending on the choices they make, the story can turn out in many different ways. Developer Norman Chan Norman Chan is an indie game developer and artist from Taiwan. **Lawnmower game where player drive lawnmower and cut grass in big open world which contain grass, and lot of different obstacles. Lawnmower has fuel consumption and player can play for 4 different mowers. Those can be unlocked after several tasks. Also game contains weather and day/night cycle and of course lot of grass to cut. Player can unlock different mowers by driving enough and long distances. Also steam achievements added Very sick title, I think I'm going to stick with it but this needs to be on the front page. It's getting a high rep for little value. A lot of value for 3 rep. This needs to be greatly improved, title isnt fully finished but its way better than the title you put in the OP. I have some performance issues with the title as well, I cant use rocket man either. OP edit: Very sick title, I think I'm going to stick with it but this needs to be on the front page. **you put in the OP. I have some performance issues with the title as well, I cant use rocket man either. OP edit: I also have some performance issues, in which i have to reduce textures (for now) in game options, to reduce that performance hit. So yes. I really dont think this title is that great. Performance issue will be fixed in a few weeks. I'll make an effort to make the game better, and after a few weeks i'll post a new version. To make an effort is already good. I can take it. My bad, performance should not be an issue now. I think i just have to do some more updates before i'll be 100% okay to release the game. Did u know that u could cut grass at any angle with this mower, its more like a helicopter to drive around all those grass..(; Performance issue will be fixed in a few weeks.
