The pack will contain 15 MEs (Musical Events), that will include the BGMs of each episode and mini-compositions in order to get the best possible experience with such a dramatic soundtrack. Join the ranks of the Elite Force Commanders, who are trying to defeat the Big Brother and prevent the Apocalypse! Dismissed in the mid-80s, save your planet now! The current setting of the game is a post-humans / cyberpunk future (about 30,000 years in the future). Humanity came back to the earth many years ago, emerging from the caves, after the fall of the last fascist government, which warred on its own people because of their will to power. Humanity has the technological and psychological abilities of the future, but it has not yet completely settled into post-human society. On Mars, Lilith, the last of the humans (also called "Augmented"), terraformed her homeworld. In her dark narrative, Lilith sees herself trapped in the world of hate and myths, which she has created for herself, and the user of its weapons. After the first Earth-Mars war, the strange and anonymous William Dix, a military scientist, found his "professional failure" with the help of his scientist wife on the computer of a neural implant. William sees himself as "a failure", his life seems to be a mess, his only career is the military and his romantic life is dead. In this narrative, he begins to uncover the conspiracy about the true purpose of the first Mars-Earth war, and probably also about the secret of the last Lilith. Sequel project: The second part will include more heavy-metal tracks, like Black Sabbath Metal, Iron Maiden Metal or Motorhead Metal! The Apocalypse - The Sun of the Future - A dystopian future is the setting of the game. The population c9d1549cdd

This is a modified version of the add-on and is the recommended add-on if you are only interested in showing us your location (and not the question itself). This add-on will prevent your location from being shown in the chat window for other users. This add-on will let you (if using the right command) hide that information. This is not intended to replace the standard "Window Visible" or "Window Invisible" from the chat window and should not be used as a replacement.
