A: There is a way to get around this issue. When you see this type of error it does mean that there is a game that has been hacked and you need to patch the game before attempting to play it. (Make sure that you download the patch for the game that you see this error for) You may find that your game is patched but not working with a download that looks like This is incorrect. The game may have been patched but the download is not the correct game or patch it for the version of the game you have. If this is the case, that does not necessarily mean the game is hacked. It can be the case that the game you download has been downloaded and been patched but not fully installed. You can try installing the patched version and see if it works. If it does not, then the game is hacked. If you do find this to be the case, you will need to contact the developer of the game, not necessarily the person posting the download. If you want to check the version of the game you are downloading, you can do so by clicking on the screenshots section of the game and you will see a column under the filename with the version number of the game. You can also hover your mouse over the file and you will find the version in a tiny little box at the bottom of your screen.
