What's new in Puzzle Monarch: Forests:

This review contains spoilers from the game. Back in the day, puzzles were either good or bad. There was no reason to be creative, no reason to make anything that wasn't the most straightforward and literal answer that could be imagined. Then, in 2003, The Witness came out, and the more or less pivotal event that started changing things forever was the inclusion of an answer-searching mechanic. As subsequent games got more and more creative, they were able to easily incorporate puzzle elements of varying levels of complexity into their games, like Senua's Saga was able to use it to tell a truly gripping story. As the genre has gotten more popular, it has become more accessible, which has led to extremely creative designs with astonishingly complicated puzzles, like this one I've spent more than a year imagining myself solving. "Solving" may be too strong a word. I'm fully aware that this is a metaphor, not a reflection of how the game works. The principle behind these puzzles is that there are hordes of soldiers who sometimes nod at you and sometimes say the same line of dialogue and that to get to the home base, you have to incapacitate as many of them as possible without ever getting too close. I've been thinking about how to make this work for way too long, and I finally got it. The truth is, I loved the puzzles in this game and I love the puzzles in this game so much because I am so easily able to avoid being repetitive and

boring, knowing that my puzzles are so over the top and requiring so much outside-the-box thinking to solve that I can't do the same puzzle twice. And I don't even like crafting puzzles. Just like in The Witness, you're always just a handful of moves away from solving them - and always beatable. First of all, if you didn't pick up on the clues from the Assassin's Creed games, this is a puzzle taking place in a forest. That's right, a forest. The main quest of Sovereign is to travel from the city to the forest, based on what you do, it's generally: "genocide all the soldiers/people if you're an Assassin, rescue the princess if you're a Knight, save the dog people if you are a Black Knight, lead the monsters away from the city if you're the
