The experience of pilots and those who used to be pilots like you in this futuristic combat era like you to enjoy all the fun of the maneuvering of the aircraft. You will experience an immersive experience through missions suited to actual battles based on the interests between countries that occurred after the actual World War II. You become the ace that all nations seek and participate in an air battle. Survive and continue your fame in this fierce air battle. It supports most VR hardware, and after boarding the fighter, you can control the aircraft using the throttle and steering wheel in the virtual cockpit via sticks and controllers. Unleash the hidden instincts of Ace in dire situations and win the battle. It is a new VR game in which a battleship and an aircraft are completely independent from each other. [Flight simulator] It has a completely different touch from a normal flight simulation game, and the feeling of actually controlling an aircraft using the steering wheel and controlling the aircraft is absolutely thrilling. Also, you can enjoy a battleship flight using the bombs on your aircraft. [Battleship] You will experience an entire battle zone using real-time, dynamic movement of battleships. It seems to be an actual battleship battle game from the point of view of the head of the ship. And the tactically difficult battles can be played in detail. THE FUTURE IS NOW! WORLD OF FIRE has reinvented the classic action-RPG and has become the new genre-defining game! You're given control of a "Dawg" --a fighter unit similar to a group of highly trained soldiers who drop into the fray, wielding several types of weapons. It's up to you to cut your way through the city's dark underbelly in the most stylish and effective way possible! Each mission in World of Fire is a huge boss encounter! But don't worry, you'll get support from your team as you battle the city's biggest villains. Fuse with them to get the most out of your custom experience! DON'T MESS WITH THE BEAST World of Fire makes no compromises. In fact, it's as visceral as it is authentic -- the new-generation of action-RPG brings the intensity of classic console titles into your living room! BATTLE IT OUT WITH THE BEST A huge world and a complex combat system set the new standard for RPGs! Customize your fighter, equip it with weapons and enhancements, fuse with your team, and help them

AI War 2 is a space combat RTS where you do not control ships but the entire AI. You command them, you design them, you build them from the ground up to take on enemy squads, fleets, and even capital ships. AI War 2 puts your design and tactical decisions into a science-fiction setting which combines a completely new, unique gameplay experience with familiar core mechanics from previous AI War titles to create the ultimate galaxy-spanning simulator. When your ship takes damage, you'll have to make critical decisions. What parts are salvageable? Should you abandon ship in favor of armor or repair? What kind of weapons or ordnance to load? Can you feed your reactor to heat up your armor or is the heat too much for your system? If all your weapons are overheated, can you break your weapons off and let them cool, or are you out of luck and dead? Will your weapons cool down in time? In this ancient setting, players will be able to run experiments with their AI to find what works best against the enemy and to go beyond the bounds of pure RTS play, such as board game-style play with special objectives, resource management, trading, and even asymmetric multiplayer content. AI War 2 is a sci-fi space combat RTS where you control the entire AI. You direct the behavior of individual ships in battle. Key Features:

- The AI is the single most important part of AI War 2. You control their behavior directly, and they control the flow of the game itself - no more third-party mods are required.
- Play as a human player, or control the entire war from a godlike perspective.
- Battle in large-scale pitched naval and space battles with up to thousands of ships!
- Game modes include: - Standard Arcade: AI War 2 plays like a traditional RTS, with the standard three resource types, production, research, and economy. - Advanced Arcade: AI War 2 features new gameplay mechanics such as the unique proprietary Resource Exchange System, as well as new mission types. - Endless: Endless mode includes unique gameplay systems such as meta-game sequencing and resource management, chain-powered progression and upgrades, galactic marketing, personal progression, and more.
- Multiplayer Coop: AI War 2 is first and foremost a single-player game. However, AI War 2 also supports local player-versus-player multiplayer matches.
- AI War 2 continues to expand its unique art style and expands its

## **What's new in RoShamBo:**

**" is a project from the Songtronics division of Musyka Music, Inc. First and foremost the project hopes to encourage the 3D printing industry and artists alike to create their own Project-X and 3D: Metaverse creations. They also hope to show "how significant this area of art is" to whoever wants to learn about it. Musyka Music Inc. holds the intellectual property, software, hardware, manufacturing services, and marketing to assist artists and publishers in creating their 3D: Metaverse creations. There will be a complete hosted educational forum created on XUB for those interested in building their own. Visitors will be able to download the source code and build their own machine with the API built into the software. This includes all the files for the projector, table, tablets, API, connectivity cables, power supply, and 3D Modeling software. The "quick start" file will download and initialize the pieces needed to get it running. Depending on the Canon MAX projector that is being used to create the holograms, the software will have a holographic overlay that will allow for a "Holographic Macro Example" to be created. The goal is to create a unique interface for sharing your project with the world. Find the 3D printed, Project-X, and 3D: Metaverse registered trademark logos below! Step 4. The following steps are provided to add support for the 3D: Metaverse project. 1. Register in the XUB/StarLedger for Fantasy Sports Click on the "accept invitation" button in the upper right hand corner: 2. Once you click on the "accept invitation" button, you will be brought to the Fantasy Sports page. Look for the heading "League" and choose one of the grouped league types. This should be the one you signed up under. You will be asked the following questions: Name: League Type: Team: Fantasy Sports Team Name: Step 5. Once you have completed Step 4 and have setup your league in XUB/StarLedger then you are ready to start! 1. Add your team name to the "Team:" field. Step 6. Once you have completed Step 5, you are ready to start! Just click "Add Manager." Step 7. So far in 2D: Holographic Events, we've loaded up two managers' manager into the 3D: Metaverse. Now you**
