Finally! Brandon and I were at the crash site after another loss in Albion. I was getting ready to go back home and couldn't wait to get in my bed... But I was stopped by the Drama Queennub. She told me that a stranger had come by earlier and seen my lack of a bed. He was a concerned "Good Samaritan" and invited me to his house for the evening. "Really? That's so nice of you! Thank you!" I was super excited! I ran back to the crash site, cut my hunting now-brother, Zider due in two weeks, and hopped in his truck and made an insanely long drive through the night. When I got to his farm, I got out of Zider's truck, and there was this adorable little face (me) staring up at me from the bottom of a basket. I was confused for a second, because you never see dogs from my tribe without their own livestock. I wonder, where the heck did he get my dog? But, when I came to, I realized that that face belongs to this little fuzzball of fun that was sleeping on him. A little later he revealed it was the same dog that I left safely at his house back in Albion. When I told him about how I didn't want to go home after another devastating loss, he told me I was the sweetest lost pup he had ever met. That night, Brandon and I ended up kissing on his couch, and for the next several days I stayed with him... forever.

To the Editor: In light of the COVID-19 pandemic, we read with great interest the article by [@bib0045] on the lack of education on COVID-19 among medical students. In fact, the authors performed a survey among their peers who concluded that undergraduate medical education on COVID-19 is limited. Our group recently conducted a cross-sectional study on medical students at West Virginia University School of

Medicine and found that medical students lack a comprehensive understanding of the disease; many of them do not feel adequately prepared to identify and manage patients infected with COVID-19, and in particular, they report experiencing stress, anxiety, and depression because of uncertainty about their personal or professional lives, as well as concern about the possibility of contracting the disease ([@bib0005]). Similar to the results obtained by [@bib0045], our study also concluded that not only have medical students not been adequately educated

What's new in Ruin Of The Reckless - Collectors Edition Art Pack:

Princess Isabella was cast in December 2003 after our catalog client Diana concluded that Jack Taylor's altered portrait was passé and required a modern revamp. This even popped up at one point during production when a "new coat of paint" for Princess Isabella was called for. Four years of hard work had gone into the creating of the "Curse," a tale of a woman who did not have to become a monster to fight evil, she became one to defeat it. It was in this very challenging role that Jack Taylor's exquisite skill stood out - the character Isabella is strong, knowledgeable and compassionate, she's a singer and writer who was tragically thrown into a loveless marriage and became a monster because of it. Jack's presentation of Isabella was a big factor in our Client Diana's reaction of, "She's not insane or the type to commit murder, but that's what this film needs." Jack's approach was to infuse the role with comedy, song and stage presence so that it no longer portrayed Isabella in an alarmist way, but instead is a realistic portrayal of a woman who becomes a monster because of circumstances. Upon the first preview of the doll, we knew that Diana hadn't rushed her into production, as many clients tend to do, and was a careful and deliberate choice. Princess Isabella has been one of my most challenging characters ever, bringing forth a great deal of compassion, sensitivity, and optimism. All the backstories we've garnered over the years about her; from her horrible childhood, to her suicidal tendencies, to the tragic circumstances of her marriage just added to the challenge, with no recipe written out by the director. It was only on this project that I was finally able to enjoy the development of the "Curse" from first conception to final delivery. Interestingly, Isabella's revolutionary nature was not only accentuated by Jack Taylor's acting, but also by his sculpting skill. It wasn't until late in the production process that Princess Isabella

realized her own "monstrosity." I think this was a direct result of the theatre we were using to get the shoot going; one of the last major cast changes was going from stage to screen, and we had a special compartmentalization system for including only areas for the star shots. In the largest theatre, the Princess had her character's head shot, arms, and legs. When those were staged, the rest of her had to be shot in a small

Preface: Age of Steel: Recharge, is a direct sequel of Star Wars the Old Republic Saga-I think. So, the "Age of Steel" is a gender-based game. Sorry if you love to fight with your male ally, but understand that *you're a female for the rest of the world*. For instance, if a woman on a dating site says that "her date is in a certain neighborhood", then she obviously means her place. So, it's better to understand this situation.
