Central cardiovascular control is

mediated via a branch of the autonomic nervous system, the sympathetic. The sympathetic nervous system comprises the Sympathetic Nervous System (SNS) which regulates SNS activity through the sympathetic preganglionic neurons, which are located mostly in the thoracolumbar spinal cord, and the Sympathetic Nervous System (SNS) controlling the baroreflex which operates at the paravertebral level of the spinal cord. Our present knowledge suggest that the heart receives both SNS tonic and phasic cardiac motor drive, with a net increase in cardiac output and SNS tonic drive being provided by sympathetic burst neurons. However, an increasing amount of evidence suggests a dual control of baroreflex afferent activity with (a) sympathetic afferent inhibition which

---

inhibits the afferent baroreflex  
(b) sympathetic afferent  
facilitation which increases the  
afferent baroreflex.  
Furthermore, a reduced  
baroreceptor reflex control of  
cardiac sympathetic outflow  
has been suggested by indirect  
evidence in the human, animal  
and using electrical stimulation.  
Thus, the baroreflex is  
susceptible to modulation and  
both the baroreceptor and the  
vagal afferents participate in a  
positive feedback loop. The  
vagal afferents may be  
involved in the positive  
feedback loop and the vagal  
efferents in its inhibiting  
component. Both positive and  
negative feedback loops may in  
addition have tonic influences,  
which become apparent in  
situations of elevated arterial

previous Star Ocean games, it takes place in the Star Ocean universe, and centers on a duology to the Blue Hearts trilogy-based Osean Star Ocean: Meltan no Sengoku. A new timeline was introduced to the series that includes new characters, new abilities, and new story lines-effectively relaunching the series. In contrast to the previous game, the gameplay introduced now has players piloting robust and futuristic aircraft and getting in exciting gunfights alongside allies who share your strengths. Star Ocean: The Last Hope was shipped on two discs. The first disc is the adventure quest and leads the player on a high-speed episodic quest across Alster Field where the storyline is continued. The second disc contains most of the side quests and, as the player advances through the story, comes to correspond to the first disc, as the story progresses. On the North American market, nearly half a million units of Star Ocean: The Second Best Hope have been sold. Publisher Square Enix claims The Second Best Hope was a top 20 best selling import of all time on the Japanese music CD market. Its two main protagonists, Renton Thurston (Devil May Cry, Final Fantasy VII) and Eureka Marcellis (Final Fantasy XII), are the new leaders of the Blue Hearts. They fought together in the previous Star Ocean game and share a close relationship. This time around, their destiny finally becomes one despite a world gone mad.
