Please can someone help me to detect whether the document is visible or not? I know the solution is to use the 'ontouchmove' event to check whether the mouse is moving over the document. But my problem here is, I am unable to check whether the user has moved the mouse pointer inside the document or not. Please can anyone give me some suggestions? Thanks. A: Detecting whether a document is visible or not can be done in many different ways, but the easiest is to use a MovieClip or MovieClip container and add a Rectangle object (it doesn't even have to be a solid rectangle) and turn it invisible when you want the document to be hidden. Then use a MouseEvent to move the rectangle 0cc13bf012
