From the creators of the EVE online modding company StarSiege comes a new space-faring action-adventure game that combines skillful combat with strategic resource gathering and a procedurally generated galaxy to roam. From the beginning of your journey, you will be thrown into the midst of a multi-faction conflict with some dark forces pulling the strings. Starting with a single spaceship and a humble base of operations, you will gradually progress through multiple galaxy sectors and eventually shape the outcome of the conflict. Wherever you choose to go and whichever side you choose to ally yourself with - the galaxy is yours to explore. Space Combat Space combat in Star Singularity is fierce and brutal, paying homage to classic space shooters - but with the sophistication of a modern physics engine and cutting-edge AI. To prevail you will have to become a skillful pilot and tactician, and craft a ship that can overcome (or evade) any foe. Outside the main adventure mode, you will be able to test your mettle against AI opponents in multiple game modes ranging from tense 1-on-1 skirmishes to full-fledged armada VS armada combat. Ship Design Spaceships in Star Singularity are the sum of

---

their parts. Different spaceships have different layouts and initial stats, but any spaceship design can be vastly overhauled and modified using components that you will acquire throughout the game: by crafting and trading, completing missions, or looting debris from fallen opponents. Swap your shields with stealth modules to trade protection for the element of surprise, replace that gun turret with a directional engine for improved maneuverability, and pair unique items for overpowered combinations that even we didn't think of. Exploration The galaxy in Star Singularity is procedurally generated with some degree of randomness between playthroughs to give you a fresh challenge each time you play. While the main storyline will send you through predetermined locations, you are free to roam the galaxy and jump from one node to another in any order you like, and the various factions will change their attitude towards you based on your actions. This cosmic-sized adventure offers unique star systems to explore, full of unique encounters. Q: Lua converting float to string I am working on a video game, and I need to convert co-ords between Eu and lu in Lua. I have figured out how to do this, but I cannot get a float to print as a string in Lua. It either shows 0 or a bunch of random numbers and letters. Is there a way to convert a float into a string in Lua? f = 80.000002; s = tostring(f) print(s) --> "0.001000000000000001e-119" A: EDIT: Here's a more precise answer, as per corbel's suggestion. The following is a better way, assuming the input is never going to be anything but float values. You can still make this one work if the input is string values, but if it contains any other type of value, the output might be unexpected. Check the code out: if string.find(s,'%f') then s = string.sub(s,10).. "%.10e" end Q: How to get a specific element in a table? How can I get a specific element of a table, for example: try { w = driver.find\_element\_by\_xpath('//form//table//td[2]//span[1]//text()').text #

---

```
w = w.split("[:en:][!en~]")[2] print(w)
driver.find_element_by_xpath('//*[@form//table//td[2]//span[1]//text()').text print(w)
driver.find_element_by_xpath('//*[@form//table//td[2]
```

In a near future which has only produced terror, the race of “Lasers” are recruited to fight with humanity, protecting them from a new menace: the Ghosts. A year has passed since AIs engineered the Ghosts to be the perfect killing machines. They are the final threat against the humans, and there is only one way to stop them: Call out the Ghosts and let them kill each other. In GRAVITY – a dark, atmospheric, pulse-pounding action game – you are the former soldier turned private eye, a ‘Lazer Hunter’. Ride shotgun in your new ghost-hunting machine and descend upon the wicked machines of the dimension called ‘Chronos’. Steal their power and use it to resurrect the dead, and bring them back to fight and kill. But be careful: your enemies, both living and dead, will do anything to kill you, literally. Unravel the mystery of the Ghost’s sinister plot in GRAVITY, a gritty detective thriller where only you can hunt down the wicked machines. Immerse yourself into a thrilling action-adventure style gameplay, exploring a living world of dark secrets and mysteries. Features: - Explore the aftermath of human-AI war with an original narrative that you unravel step-by-step. - Fight your way through a living world: the world of the Ghosts! - Encounter the AIs – your deadliest enemies and ultimate rivals. - Steal the Ghosts’ power to create powerful tools for your fight against the dead: ghouls! - Equip powerful weapons and unique items to complete your mission. - Unlock new missions, collect and upgrade weapon types: all your hunting strategies will be put to the test. - You can upgrade your skills and become a ‘GRAVITY Operative’, unlocking new and useful equipment, special devices and abilities. - Fight against more than a dozen of opponents in battles of epic proportions. - Enjoy a challenging endless game-play with an unique final boss. About This Game: As it has taken over the world and caused mass destruction and death on an immense scale, the Undead have become the most hated species on the face of the Earth. Four special children are drawn into a conflict they cannot begin to

----- When you're playing this game, press LB to switch to the Micro Thong Red outfit. In the bathroom, you can have a shower. In the dressing room, the video will play. When you finish changing, just continue with the next stage. When you run out of the video, you can continue by pressing Up or Down. While you're running, take the left direction by holding Down. This outfit also has the Bunny Glove as an accessory. Character Items: ----- If you have the Micro Thong Red outfit when you enter the Hospital, you can check the box in the wardrobe. If you've already given birth, you can also check the box. Attacker Cards: ----- When you clear the final boss, you'll be able to check the box. You can use these cards to turn off any effects displayed on the screen. You can check the box if you want to use the card. For example, you can see 'Cure' and 'Flash' effects on the screen. The effects turn off once they start. If you activate the effect again, it won't turn off again. To turn the effect off, you'll have to attack the boss again. Effects ===== Each effect is displayed on the screen. Flash Card: ----- When you use this card, it displays a small yellow card. You can find this card on the ground in the scene where you had to attack the main boss. Cure: ----- When you activate this effect, the display is changed to the screen before the regular display. Flash: ----- When you activate this effect, all of the enemies in the scene change to the red color. Bunny Glove Card: ----- If you equip the Bunny Glove and activate it, the Bunny Glove will change to the hand side, and you'll get 'Bunny Glove'. Show Off Bonus: ----- When you use the Show Off effect, you'll be able to use the effect again. If you activate it again, the effect will appear only once. Show Off Skill: ----- If you activate the Show Off effect, you'll have a chance to use a skill that has 'Show' in its name. In the skill screen, when you press Up or Down, you'll be able to select the
