UnDBX

UnDBX is a small Windows application designed specifically for helping you extract email messages from Outlook Express and save data to EML file format on your computer. The advantages of being portable The tool is delivered in a portable package which can be deployed on your system without having to follow the steps included in a normal installation process. Uninstalling the utility means deleting the files that you have downloaded from the Internet. It is important to mention that the application doesn't leave any configuration data in your system and write entries in your Windows registry. You can also copy it on any USB flash drive or other devices and run it on the target system without having administrative privileges. Minimalistic looks UnDBX sports a clean and simplistic GUI that doesn't include complex configuration settings. There's no support for a help manual but the layout is highly intuitive so you can venture into tweaking the process on your own. Extracting emails from your Outlook DBX files The tool gives you the possibility to select the source folder that includes the DBX files from where the information is extracted and specify the saving directory where the EML files are saved. Aside from the two configuration parameters, you may enable the Recovery Mode that can be applied especially to corrupted DBX files. During the recovery process, UnDBX scans the DBX file for email message fragments and collects them into EML items. Plus, all messages are extracted using this particular mode, regardless if they exist in the output destination or not. Sync options When you grab data from DBX files for the first time, the tool extracts all messages as individual EML files. For future tasks, the application is able to sync the output folder with the contents of the DBX file, more specifically if it finds new messages, it extracts them. In case they are already present in the target destination, messages are ignored. Bottom line All things considered, UnDBX delivers a straightforward solution for helping you extract emails from Outlook Express, and is suitable for all types of users, regardless of their experience level. Advertising Read more The teacher and his grandson were visiting the Jewish Cimetière du Montparnasse in the city's 15th arrondissement when they vanished, according to Agence France-Presse. The teacher was identified by his initials, P.L. Police are investigating the case as "suspicion of kidnapping." Paris prosecutor Michel Valet told AFP. The teacher was apparently visiting the Jewish cemetery when a relative noticed that he had left the premises with his young grandson. According to the newspaper La Croix, the teacher's car was found parked on a road across the street from the cemetery in the eastern suburbs of Paris. The teacher's car, license plate T7019D0, was found near Saint-Laurent-la-Roche, some 10 kilometres (6 miles) from the cemetery on Monday. Judah Ari Gross, a prominent Israeli rabbi, said the missing man was teaching at the Beit Lechem Jewish elementary school in Paris since January. He also runs a small publishing house and according to an article by Rachid Koraichi in Le Matin Dimanche, the missing man was a lecturer at the Collège de France. Judah Ari Gross said the recent circumcision rite of his grandson was performed by Gross himself and a high-ranking rabbi in Israel. The procedure involved the removal of the child's foreskin, according to the Israeli newspaper Haaretz. Days after the incident, Gross told the newspaper that the rite was related to his grandson's bar mitzvah. According to Haaretz, Gross said the circumcision was supervised by Jewish elders in France. Parents of the boy claim the rite was conducted in Israel by Gross, a rabbi in France, and b7e8fdf5c8
