Artwork: Dave Gibbons - WIRED Image Comics - TALES FROM THE CRACKED APEX Note: The six prequel pages will be inserted as a single page on disc (each numbered manually).With the "End of Times" hitting us all really hard this past week, it's easy to forget all the good things going on in life. I'm talking about the first genuine week of fall, the kids are getting older now, the weather is changing, back to school time, Halloween, Thanksgiving - a time for family togetherness and to reflect on how good life is. I'm glad that we're all able to share that with one another. Last week, we had a dear friend of ours over for dinner. I've met her only once before, and it was so fun to reconnect with her and see how well she's doing. There's definitely a sisterhood among women that helps each other so much as we grow through life together. I love the women in my life - they're some of the best people I've ever met! I try to make every week a success because that's what life's all about, right? Well, I had to stop myself from sounding like a 12 year old over the weekend. LOL!! With getting my daughter ready to go back to school and the process of finding her a good school for her personality (and getting a job and a house on my own), I haven't had a lot of time to do anything fun or relaxing. I'm almost going to work late tonight because we have a PTO meeting and I don't want to be late! But I also want to be prepared. Then I'll relax by blogging and taking my husband to the dentist. I'm pretty sure he's dreading it and I wouldn't want him to be in pain either. This weekend, we d41b202975

What's new in Beyond A Steel Sky Prologue Comic Book:

For All of Us to Love What if the Prowler went to town in his dark spacesuit after snagging the Tollway 6 moose but then discovered he has amnesia and can't remember he is Frankenstein's monster and he does the drive-thru ordering in the costume & goes to your house after work and hires you as a "help-mate"? You now have a better understanding of The Prowler's motivation. It's about this time you'd start getting all the clues and wondering "did the Prowler read 'Artemis Fowl', or 'Astro City', and/or 'the Universal Guide to Mutants'? and maybe he was obsessed with some tv show where the protagonist was constantly getting shrunk to microscopic size to hide from the evil corporation that made the MacGuffin Machine that shrunk people and [X-men] used it and..." To wrap up the review I'll provide some plot spoilers in case you've never read the Alan Moore story about Pumpkinhead from Journey into Mystery Comics #92, or the Ultimate or X-men spinoff Cable, or the Marvel Team-up Star Trek #2, or.....spoilers...I could dig into such a thing any number of non-metaphorical ways but in the interest of plotting out some possibilities I'll just dive right in. In Journey into Mystery #92 a Prowler comes home to find Frankenstein's monster asleep in his bed, he attempts to wake up Prowler's friend the Wolf Man, as the Wolf Man is particularly susceptible to Prowler's strange ways, but the Wolf Man assumes Prowler's strange, jovial demeanor is purely because it's Halloween, as he detects all kinds of unusual activity going on in the house, the house has been disarranged, he had a sewing machine stuck in the throat of a mule (a mule?) and his bed has been covered in bizarre paintings, and the Prowler tells the Wolf Man they need to go find Frankenstein's new monster, calling him Pumpkinhead. Somethin' weird's goin' on here. But it gets weirder for the Prowler when he unknowingly purchases some Wildcat davenport, instead of
