For any future questions about this site, send a mail to spam@soft211.orgFor those who have not followed the case of JP Morgan Chase bank we introduce our BitBurst Bitcoin mining software. However if you are a software developer, you can download the full source code from here for further information. The system is based on an open source Open Source license and is designed to work with either 4 ASIC chips from a major manufacturer like Avalon or with bare ASIC chips. To use it you first need to install the BitBurst miners, that can be downloaded from the Bitcoin Mining FAQ. After the miner has been installed you will need to generate the drive images using the following command: bitburstimg-0.8c --help Which will give you the following response: (
