Easy TV

This app allows you to watch televisions, worldwide, with one click. EasyTV contains over 10 000 channels and is capable to add your favourite channels to your favourites. It supports multiple languages (auto-detects them and shows the language accordingly). With EasyTV you can watch over 20000 live tv channels, in almost all the languages on the world. You can add your favourite channels to the favourites list, specify the country, language and watch from any country. You can add new channels to the favorites and synchronize them in all your devices, making your watching experience the most enjoyable. Along with the live channels, EasyTV also offers many of the best world wide video on demand channels. It's a really simple to use app, and it displays all the information you need to know about the video. You can add the video to the favourites list, mute it, change the volume, stop it or start a new one. This is how you do it: ★ Add a channel to your favourites list Open the favourites menu by pressing the menu button on your remote or by tapping on the icons on the home screen (if your receiver is connected to your computer using ethernet, you can add the channel using the remote). ★ Add a channel to your favourites Press the menu button on your remote and then click on the "Favourites" menu

option. ★ Add a channel to your favourites Add the channel you want to add to the favourites list by pressing the menu button on your remote or by tapping on the icon on the home screen (if your receiver is connected to your computer using ethernet, you can add the channel using the remote). ★ Add a channel to your favourites Once you have opened the favourites menu, tap on the "Add" option on the bottom left corner. ★ Add a channel to your favourites Now, you can choose a country and a language. If you want to choose the app language you can just tap on the language on the bottom left corner. ★ Add a channel to your favourites Choose the country from the drop down menu. You can choose more than one country if you want to. ★ Add a channel to your favourites Choose the language from the drop down menu. ★ Add a channel to your favourites Now you can choose the channel. ★ Add a channel to your favourites When you are done, just tap on the "Done" option and the channel will appear on the favourites list. b7e8fdf5c8

Easy TV Crack+

Easy TV is a freeware program that lets you watch online television with ease, offering a comprehensive list of channels from multiple countries of the world. The application is pretty easy to use and that happens especially thanks to the user friendly interface that provides instant access to the available TV stations. Channels are listed, as we said, by country, so it's pretty easy to find the one you're looking for. Plus, you can add some of the stations to favorites, so playing the same stream at a later date is even easier. Besides the fact that it shows ads right in the main window, Easy TV also displays station information, with details such as category, website, created and played date and schedule. Plus, there are the common video controls, such as stop and mute, as well as a volume slider to adjust volume on the go. Another useful feature of the program is the station editor which gives you the power to add new stations to the list, with required details including URL, website, comment and bitrate. Easy TV works okay most of the time, but many of the available streams are down. In addition, there are many popular channels missing from the list and although the app lets you add your very own entries, it's a pain in the neck for every user to do that manually. The amount of needed resources is low and Easy TV has absolutely no problem to run on all Windows versions on the market. Overall, Easy TV is a handy piece of software, but it needs a major update, not only to remove the dead links, but to also expand the station list. Download Easy TV for Windows: A Lister and ListBox are two very nice class for Windows that can help users easily create and manage the list of data, text, date etc. without need of copy/pasting. Today this week I would like to introduce a lister UI for Windows with a ListView, its not free, its also requires a license, however, it is a nice simple UI with lots of customization options. What's New In Easy TV?

Easy TV is a freeware program that lets you watch online television with ease, offering a comprehensive list of channels from multiple countries of the world. The application is pretty easy to use and that happens especially thanks to the user friendly interface that provides instant access to the available TV stations. Channels are listed, as we said, by country, so it's pretty easy to find the one you're looking for. Plus, you can add some of the stations to favorites, so playing the same stream at a later date is even easier. Besides the fact that it shows ads right in the main window, Easy TV also displays station information, with details such as category, website, created and played date and schedule. Plus, there are the common video controls, such as stop and mute, as well as a volume slider to adjust volume on the go. Another useful feature of the program is the station editor which gives you the power to add new stations to the list, with required details including URL, website, comment and bitrate. Easy TV works okay most of the time, but many of the available streams are down. In addition, there are many popular channels missing from the list and although the app lets you add your very own entries, it's a pain in the neck for every user to do that manually. The amount of needed resources is low and Easy TV has absolutely no problem to run on all Windows versions on the market. Overall, Easy TV is a

handy piece of software, but it needs a major update, not only to remove the dead links, but to also expand the station list. Sosumi DvD Player is a powerful freeware software that lets you play DVD and VCD files on your Windows system. Plus, this program supports a lot of formats such as MP3, WMA, VOB, AVCHD, MPEG-4, MPEG-2, WMV, MOV, 3GP, AVI, and more. The main window of the software shows the video in full screen with the main controls that allow you to play, pause, stop, etc. Besides the controls that already mentioned, you also have options to adjust the volume, and select subtitles. Sosumi DvD Player is a nice piece of software, but as it doesn't have a trial period, you can't test it without purchasing it. The amount of needed resources is pretty low and the program works fine on all Windows versions. Sosumi

System Requirements:
