Overview [edit] As of 2012, AutoCAD is available for use in schools, universities, design studios, engineering offices, and for general-purpose personal home use. AutoCAD is intended for mechanical, architectural, civil, electrical, industrial, landscape, and interior design. All versions also include engineering, drafting, and graphic design. AutoCAD 2011, 2012, and 2013 were the most recent versions developed by Autodesk. Versions up to 2007 are referred to as "AutoCAD Classic," while the 2009 release is "AutoCAD 2009." AutoCAD is available for the Windows, macOS, and Linux operating systems.

Additional releases of AutoCAD are available for AutoCAD LT, which runs on the Windows, Macintosh, and UNIX operating systems. Versions [edit] AutoCAD currently runs on Microsoft Windows, macOS, and Linux. Program information [edit] AutoCAD is one of the leading desktop CAD applications available on the market. AutoCAD has been available for both personal and commercial use. In November 2009, Autodesk introduced AutoCAD 2009. However, AutoCAD 2009 was not available for Linux or Mac. AutoCAD 2010 was introduced in November 2010, but it did not contain all the features of the 2009 release. In 2014, AutoCAD made a complete rewrite in the program, which included a move from a.NET application to a.NET Core application. The rewrite was also used as an opportunity to completely re-write the application on the Windows platform for the first time in 14 years. AutoCAD 2017 is the first AutoCAD release to be updated to Windows 10. Languages [edit] AutoCAD is available in seven languages: English, Spanish, French, German, Dutch, Portuguese and Italian. AutoCAD also offers an English to Spanish, English to French, and English to Portuguese, Italian, and Dutch translation service. Keyboard [edit] Using the keyboard to control AutoCAD is similar to using the mouse, and consists of the following commands: Enter [edit] Enter is the standard action of moving the cursor to the next item on the screen and bringing it into the foreground. It is generally the leftmost command in the command-line bar. For example, if the mouse cursor is placed over an object, a press of the Enter key will move the

Awards and recognition Autodesk Architecture, Model & Simulation (AMS) Products have been included in Technology of the Year lists, including Best of What's New (Autodesk, 2016) and Best of Add-ons (Autodesk, 2015). Autodesk received the American Institute of Architects (AIA) 2016 Firm of the Year Award for Technology. On March 14, 2011, Autodesk announced that Autodesk 3ds Max 2010 has been named by PC Magazine as the best 3D modelling and rendering software of 2010, the second straight year that the software made the list. In November 2012, Autodesk 3ds Max 2009 was selected as one of five finalists for the People's Voice Awards, which recognizes the 2012 "most useful" technology. Autodesk 3ds Max 2009 was recognized for its "smooth and intuitive editing tools, powerful tools for the creation of 3D animations and graphics and the ability to import real-world data, in both 2D and 3D." Autodesk Media and Entertainment Solutions (AME) was named a finalist in PC Magazine's Best of 2013 Productivity Tools. Autodesk Media and Entertainment Solutions was also awarded the Gold Stevie Award in the category of Best Customer Service. Autodesk AutoCAD 360° and Autodesk AutoCAD Architecture 2012 received Stevie Awards for the Best Service or Support Product in the Productivity & Business Innovation category. Autodesk AutoCAD 360° received a 2012 Gold Stevie Award for this category. Autodesk AutoCAD Civil 3D 2011 received a Gold Stevie Award in the Engineering category. Productivity In 2016, Autodesk acquired a majority stake in NAVIS to create a new, unified cloud collaboration platform for construction. Autodesk Dynamics 365 Construction Cloud was released in June 2017. Other products Autodesk Construction Management, first release in the US in 2005. The software automates project management tasks by allowing users to track project costs, schedule, and work progress through a single view. The initial release used other Autodesk software as its back-end databases. The Construction Management software was expanded to include Civil 3D ca3bfb1094

Luminescent inorganic nanoparticles (LILONPs) are nanoscale metal oxide particles that exhibit luminescence in the visible range. In this study, we synthesized and characterized LILONPs with two different nanoparticles of ZnO, ZnO-C and ZnO-P. Their photoluminescence and thermal stability were evaluated. In addition, we evaluated the effect of the LILONPs on the soil pore water dynamics, adsorption of some organic pollutants, and viability of the soil microorganisms. After adding LILONPs to the soil, a significant decrease in pore water exchange and enhanced adsorption of the organic pollutants such as 2,4-D and Carbofuran were observed. The soil microbial population was significantly affected by the presence of the LILONPs at the concentrations that induced photoluminescence. Thus, LILONPs are a potential tool for monitoring the soil environment. With the 2018 General Assembly in full swing, candidates are at it again in earnest. The major political parties and state and local parties have released their proposed legislative agendas in what will likely be the most important year for statewide lawmaking in many years. The U.S. Supreme Court has granted certiorari to review a petition to rehear the case of Citizens United v. Federal Election Commission, which is likely to be the most significant decision of the Court's new term, and to which the Institute for Justice has filed an amicus brief. Most Americans have heard the expression "the courts are the final word" (or "the courts decide"). But the courts aren't the final word on anything. What they do is give legal opinions on what the law is—and then the people decide how to apply the law. $a^0 = 1$.
