We have been working very hard to finish the house and all the building. We are happy that we have been able to start a brand new life in south-east Asia! We have everything we need here, but the lack of internet is a big problem. We really miss you all and hope you can see our Facebook page to learn how we are doing. Our house is done and we love it! It is on a nice stretch of land with woods on one side and the ocean on the other. We have lots of animals (babies included), a small store and even a hospital. We can see the ocean through the trees. We are very close to a supermarket, where we go for vegetables, rice and bread. We drive most of the day on dirt roads, go fishing at night and have wonderful, quiet time. In January we got a baby girl, whom we call "Najla". She is very cute and we love her. We have already talked to the community and have been told that we can come to visit any time. You are very welcome to come! We will definitely let you know when we have a certain time for a visit. If you need to contact us, please email us at the following address: aanmelding@gmail.com. We miss the internet very much and will really appreciate your help to get back in contact with our family. On March 23, 1997, federal and state authorities announced that managed care organizations would be excluded from participating in Medicare Advantage. The exclusion was announced before significant implementation of the program had taken place. It is unclear if it will be an obstacle for some of the 1.3 million Medicare beneficiaries enrolled in these plans and if it will affect the delivery of health care to these beneficiaries. A series of scholarly articles examines the impact of the exclusion, and offers perspectives on these issues.Synopsis Storyline:
