Track Revisions: Start and end in the correct drawing space. Change the drawing space in your drawings to focus on a particular drawing space, or use the Current Drawings view to see your drawings in their own space. (video: 1:12 min.) Review all changes made to a drawing. Get a complete history of all revisions to your drawings with the Revisions Manager. Compare a drawing with the original. (video: 1:16 min.) Polar Coordinate System: Draw more accurate circles. Use the Geographic and Polar Coordinate Systems with the new Designer and Draw objects to create more accurate shapes and better-looking math and text. (video: 1:15 min.) Using polar coordinates, you can draw circles, circles with radiuses, and even arcs, without calculating coordinates yourself. (video: 1:45 min.) Geographic coordinates let you draw in any direction on the map, rather than being constrained to the map's north and south poles. (video: 1:13 min.) Draw lines, polygons, and splines in polar coordinates, including the ability to curve with any radius. (video: 1:14 min.) Optimized for Multicore: Maximize the power of your multi-core computer. AutoCAD uses C# for native compilation, and is optimized for 64-bit and multi-core computers. (video: 1:20 min.) When you use a drawing with 32-bit floating-point precision, AutoCAD uses graphics card hardware to accelerate calculations. If your computer has more than 4 cores, your AutoCAD experience can be greatly improved. (video: 1:14 min.) Accelerated performance for floating-point operations and memory access is available for the entire drawing area, not just a view or work space. (video:
