The series focuses on a recently married couple who discover that they are expecting children, with both of them deeply unsure how the relationship will change. The series began broadcasting in the UK on ITV on 6 February 2016, ending on 16 March 2016. It was positively received by critics with most reviewers noting Bean's voice acting as the focal point of the series, which is why he received critical acclaim. A spin-off series, Sons and Daughters: Next Generation, which aired on ITV from 14 March to 13 April 2017, was set four years later, and filmed in Leeds, West Yorkshire. Cast Richard Bean as Simon Francesca Delbon as Petronella Rowan Atkinson as Henry Skye Lennox as Ivy Ruth Jones as Rose Meg Donnelly as Wendy James Bardsley as Adam Clare Kerrigan as Lauren Julie Hesmondhalgh as Carol Jaye Griffiths as Laurence Jon Culshaw as Roy Allison Steadman as Catherine References External links Category:2016 British television series debuts Category:2017 British television series endings Category:2010s British comedy television series Category:2010s British sitcoms Category:British sitcoms Category:English-language television programs Category:ITV sitcoms

EasyWare Multi-KeyFile Generator.exe WEB.comname : EasyWare Multi-KeyFileÂ·Q: Is there a way to fetch the height of view in ConstrainedLayout so that i can detect the background color? I have a gradient Drawable as a background to my ConstrainedLayout(by using background android:id="@+id/header"). I have a height of 315dp set for my ConstrainedLayout. So i would like to check the background of the ConstrainedLayout(which is the

gradient drawable) and if background is deep enough then i would like to set some animations on the view. The problem i am facing is that i do not know the exact height of ConstrainedLayout(since its not a fixed value). So i am trying to find a way to get the height of the background of the ConstrainedLayout(gradient drawable). I tried looking at the content view of the ViewGroup(containing the ConstrainedLayout) and get the height of it but it seems like its of different values in each layout and i couldnt find a way to get this value. A: It seems that ConstrainedLayout can be used to set some animations for your view as long as you set the background to be gradient drawable and it is deep enough! So, to achieve what i wanted, i simply used ConstrainedLayout and set the background drawable to be gradient drawable with both end points as 0dp and somehow got the height.

```
private int getHeightOfView(View v) { if (v instanceof ConstrainedLayout) { ConstrainedLayout cl = (ConstrainedLayout) v; int height = (int) cl.getMeasuredHeight(); return height; } return v.getMeasuredHeight(); }  
private void setAnimation(View v) { int height = getHeightOfView(v); float start = v.getMeasuredHeight() + 50; float end = v.getMeasuredHeight() + 100; ObjectAnimator anim = ObjectAnimator.ofFloat(v, "translationY", 0, start); 6d1f23a050
```
