PLEASE PATCH! This is the best game ever but it needs patching. The game gets stuck in the middle of a mission, you can play just fine as normal, but when you go to do it again it freezes. On version 1.0.2 (or 1.0.3). It happens on the start mission as well. If you are attempting to play this game, PLEASE patch it! It's a shame because this game is great. It's the game I am going to be selling to get me funded to make my first game (whose name I will post a link to soon). This game is full of visual glitches and some bugs. PLEASE PATCH. It's the best game EVAR! 2.50Avg 20/06/2014 Emperor: Rise of the Middle Kingdom 2.0.0.2 Crack 5.00Avg 21/02/2008 I don't know if this will help but I fixed a mission in the game with 4 illegal people. I other person saw that I was going to do that and told me to quit it and I did. But I thought there might be others out there
