Pursuit of Riverdeep is an indie action-adventure game featuring 2D sprite graphics and 3D sound. With a moody palette of grey, brown and beige, the game has an overall somber feeling that, unlike many indie games, is not accompanied by a ridiculous soundtrack and upbeat music to cheer you up. This fun title can be unlocked at the end of the game by picking up an enigmatic message from the now-vanished protagonist. Once you have reached this point, you will be asked to construct a word puzzle with the selected letters. When you have accomplished this, you will be taken to the front door of the village in the forest, and as you head towards it, the game will play a clip of music (one of which is previously mentioned). The game has been designed to recreate the atmosphere and charm of the original games as much as possible, and many puzzles are based on the original designs. In addition to this, many other elements of the original games have been implemented in order to create a much more immersive experience. This includes: It also features an eponymous quest that's much like the original, but the puzzles in this one involve constantly changing the width of the lines to make new words. In contrast to many indie games, it's a difficult, but ultimately quite rewarding experience. The soundtrack features a wide variety of tracks, including the music from the original, featuring new music inspired by the original, and some original compositions by the composer who produced the game. There is also a short parody of 'Symphony' by Taeja, which is likely to either be placed in the game or at the very least in the menu screens. This Indie game is being released on May 20th, 2012 and will cost \$5. It has many unique features. For starters, for a Gameboy Mini there are many beautiful sprites! The Music is also good, and will be a perfect ending to a fun game. Overall, I think this game is a great addition to GBCs library and I hope it gets high scores! This is a new and fresh take on an old classic! I love it. And now I have a new favourite song from my childhood, played back to me in a game on my newest handheld system. Flappy Bird, the single-player version of Flappy Bird, requires players to tap the screen to cancel the bird's continuous flight at the top of the screen.
