LBP2900cw driver download for Windows/ Windows .Q: Mongoddb merge array and search I have a mongoddb collection: `_id: string []links: string` I need to merge this data and find a string in this links array. But I don't know how to do it, and I didn't get any results with google. If anyone know what I should do or can point me in the right direction, thanks! A: You can aggregate to get the information you want using the \$concat operator. You would use the \$replaceRoot operator to completely rewrite the array to have an array with the same name as the document key. `db.col.aggregate([ { $addFields: { links: { $concatArrays: [{"a"}, {"b"}, {"c"}] } } }, { $project: { _id: 0, links: 1`
