## **\_\_FULL\_\_ Download Grand Twrp Ms013g Build2 Tar**

July 10, 2014 - it's time to flash the recovery, put Grand 2 into download mode again. Click on the PDA button. Find and select twrp\_ms013g-build2.tar ... The firmware may not be installed, but I have it in the kit. The firmware process has begun, and you need not to miss the moment of the recovery firmware. If you do not know how to do this, then I will tell you. We press the PDA button and hold it for a few seconds until a window pops up with a suggestion to flash the recovery. And here a list of recovery partitions will appear. We need to select the "recovery" section and click "OK". Then the firmware process will begin. Flashing recovery is easier than rooting.
