Rockstar Games San Andreas.Genetic locus of autosomal recessive periodic fever. A study was conducted in order to define a genetic locus responsible for a familial autosomal recessive periodic fever. Mutation analysis of the PKR gene was performed by polymerase chain reaction. Biochemical evaluation was carried out to detect pyrin, an IL-1 receptor antagonist. Morphological studies were also performed in an affected individual and his family. Mutation analysis revealed that the individual suffered from hyperpyrexia due to a homozygous G to T transversion at position -1 of intron 4 of the PKR gene. This mutation creates a splice acceptor site, thus, resulting in a complete loss of exon 4. The mutation was found to segregate as an autosomal recessive trait. Serum amyloid A was not present in the affected individual.
