Microsoft Office 365 Product Key Activator unblocks the product key and will let you use Office 365 Pro Plus edition of Microsoft Office 2013 and all its. Valero East Texas Refinery and Holly Frontiers Pipeline Project The Valero East Texas Refinery and the Holly Frontiers Pipeline Project are a pair of oil refineries and pipelines that will be built by Valero Energy. The construction of the project will be done in 2 stages. The first construction stage was to begin in August 2014. The last construction stage was to begin in August 2015. The refinery is expected to be completed in 2018 and the pipeline in 2019. Concept The idea of building this refinery was originally proposed in 2014. The two refineries will each be three times as efficient as the previous Valero refineries. The pipelines will allow more profit, as compared to other pipeline projects. In total, this project is estimated to generate \$35 to \$50 billion of economic impact on the North Texas economy. Cost Cost of the refinery is estimated to be around \$1 billion. The pipeline project will cost another \$4 billion. All in all, the project will cost roughly \$5 billion. The development time for the project is estimated to be 15 years. Pipeline The pipeline that will be built as part of the project will be long. The construction was expected to begin in August 2014. References Category:Valero EnergyQ: Assign a mapping from String to String I have a mapping from character String to character String. I need to find the length of longest sequence of same characters. For example, the length of "ABC" in the sequence "ABCABCABC" is 6. However, when I assign a mapping from String to String, I get a wrong answer. This is my code: public class FindLongestString { String longest = ""; Map map = new HashMap(); public void add(c6a93da74d
